Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Velia (U.S. Patent Number 4,510,770) in view of Hixson (U.S. Patent Number 6,173,582).

Velia discloses a chest for storing, cooling and dispensing comestibles. Referring to Figs.2,4,6,9,10 and 14, the chest 20 comprises a front wall 24, a rear wall 26, a pair of sidewalls 28,30 and a bottom joined together to form an enclosure. A lid 34 is removably mounted by means of interlocking edges of the top of the enclosure. A pair of chutes 46 is disposed beneath the food compartment 68. The bottom of the chutes 46 opens into a dispensing station at an opening 56 in the front wall 24. Opening 56 is selectively closed by a dispensing door 58 which is pivotally mounted at the bottom of opening 56 by means of a hinge 60. The top wall 48 of the chutes 46 is spaced from the backwall 40 and bottom wall 38 of food compartment 68 thereby defining an ice compartment 42. The bottom portion 42b of the ice compartment 42 is closed by a connecting wall 66 extending between bottom wall 38 and top wall 48, thereby preventing escape of fluid or cool air from the bottom of the ice compartment 42. Velia discloses the cans are loaded through openings 56,80 or 93. However, Velia does not disclose the loading located at sidewall. Hixson discloses opening at sidewall in the same field of endeavor for the purpose of loading. Therefore, it would have been obvious to one having ordinary skill in the art at the time

Art Unit: 3744

the invention was made to provide the apparatus of Velia with a sidewall opening in view of Hixson in order to load the cans.

Allowable Subject Matter

3. Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chen-Wen Jiang whose telephone number is (703) 308-0275.
